EDUCATION

B.Tech in Computer Science & Engineering (IoT Specialization)

G.H. Patel College of Engineering & Technology

Sept 2022 – Jul 2026

CGPA: 9.26

Coursework Highlights: Data Structures, Design and Analysis of Algorithms, Operating Systems, Data Communication and Networks

EXPERIENCE

• Brainy Beam, Ahmedabad

May 2025 – Jun 2025

Web Development Intern

- Engineered a modular MEAN-stack application with REST APIs, reusable middleware architecture, and MongoDB schema design.
- Built backend request-processing workflows using Express.js, including validation, routing, and environment-based configuration handling.
- Integrated database operations and API communication layers to enable dynamic user-driven data management.
- Managed deployment-ready project structure with scalable separation of frontend and backend services.

ACHIEVEMENTS

• State Winner – Best Business Idea Contest (BBIC):

2025

- Secured **1st** place among 15 state-level teams for presenting an alternative energy generation model; awarded 15,000 cash prize.
- Proposed an **innovative energy model** to replace coal for meeting India's growing power needs, evaluated by a panel of experts with over **20 years** of experience.

• IEEE Member:

2022- 2023

- Served as a member of the Institute of Electrical and Electronics Engineers. Actively participated and organized technical **seminars and hands-on workshops**.
- Organized and managed a 4-day technical event with **500+** participants. Coordinated logistics, promotions, and execution with a cross-functional team.

TECHNICAL SKILLS

- Languages:** C++, TypeScript, Python, Java, HTML5, CSS3
- Frontend:** Next.js, React, Tailwind CSS
- Backend:** Node.js, Express, Websocket, REST APIs
- Databases** MongoDB, Mongoose, Postgres, Prisma
- Tools & DevOps:** Git, Postman, Docker, Turborepo

PROJECTS

• Excal.Draw | GitHub

Turborepo, Nextjs, Typescript, Prisma, Postgres, Express, Websocket

- Implemented WebSocket-based real-time synchronization for multi-user canvas updates with low-latency state propagation.
- Integrated local persistence and secure room-based access, ensuring data durability and private collaboration environments for distributed teams.

• NeuroNest | GitHub

TypeScript, React, Express, TailwindCSS

- Built a fully typed web app with strict TypeScript typings, ensuring **100%** end-to-end type safety and reducing integration bugs by **~40%**
- Optimized application performance to a **96%** Lighthouse score, reduced LCP to **<1.4s**, and ensured **92%** Best Practices compliance for enhanced user experience

• Socket Talk | GitHub

ReactJS, TailwindCSS, NodeJS, WebSockets

- Deployed on Vercel(client) + Render(server), ensuring continuous integration and delivery with over **99%** uptime post-deployment.
- Engineered WebSocket-based real-time session management supporting **500+** concurrent users with minimal latency
